SUMMARY OF ELECTRICITY GENERATION VOLUME OF POWER PLANTS FOR THE FIRST QUARTER OF 2025

This announcement is made by Beijing Energy International Holding Co., Ltd. (the “**Company**”, collectively with its subsidiaries, the “**Group**”) to keep the shareholders and potential investors of the Company informed of the latest business development of the Group. The board of directors of the Company announces that according to the Group’s preliminary operation statistics, the 247 power plants beneficially owned by the Group and its associates have generated electricity in an aggregate volume of approximately 6,087,012 megawatt-hours (“**MWh**”) in the first quarter (“**Q1**”) of 2025.

Details of the electricity generation volume statistics in Q1 of 2025 are summarised as below:

		As at 31 March 2025				Approximate Electricity Generation Volume for

Notes:

- (1) The total capacity on-grid mode refers to the settlement of all electricity volume generated by a power plant with the grid; while the surplus capacity on-grid mode means that a portion of the electricity volume generated by a power plant is sold directly to the end-user and the surplus electricity is settled with the grid.
- (2) Some of the power plants of the Group increased grid-connection with further installed capacity of approximately 173MW in total in Q1 of 2025.
- (3) There were six solar power plants self-constructed by the Group, which achieved grid-connection with total installed capacity of approximately 386MW in Q1 of 2025.
- (4) The operation figures previously announced have been adjusted to be in line with the available accounting figures and to reflect the changes in the Group's portfolio of power plants with effect from each transaction's respective completion date.
- (5) The figures provided herein are subject to rounding adjustment and will also be subject to other possible adjustments due to accounting procedures.

Shareholders and/or potential investors of the Company are hereby reminded that the information provided above merely represents the preliminary operating performance of the renewable energy power plants beneficially owned by the Group and its associates as of 31 March 2025 based on data currently available to the management, and is by no means a representation or a basis of reference or indication of the revenue or profit to be generated or derived by the Group or any financial performance of the Group in Q1 of 2025 or for the three months ended 31 March 2025. Accordingly, shareholders and/or potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.
