BUSINESS REVIEW AND PROSPECT

Business Review

The operating environment in Hong Kong is still challenging in the first half of this fiscal year. The result of the Group for the six-month period ended September 30, 2007 recorded a consolidated loss of approximately HK$5.4 million. (2006: approximately HK$4.1 million)

The Group continued to focus on the apparel retail market in Hong Kong. The turnover of the Group for the first half of the fiscal year was approximately HK$56.6 million, representing an increase of 0.3% when compared with the same period in last year. The slightly increase in turnover was mainly caused by the improvement in the retailing industry in Hong Kong, however, the keen price competition in apparel retail market limited the degree of improvement of the turnover for the period.

The management team of the group applied various strategic measures to maintain the gross profit margin of the Group at a relatively high level. Although we are still facing the inflationary pressure in both the imported raw material and fashion accessories and the keen price competition in apparel retail market, the gross profit margin of the Group for the period ended September 30, 2007 was slightly increased by 1% from 66% in last year same period to 67% in this period.

The Group keeps on deploying stringent control on operating costs. The ratio of distribution costs and the administrative expenses to turnover for the period were approximately 40% (2006: 40%) and 36% (2006: 35%) respectively. The increase in operative expenditure is mainly caused by the inflation in retail rental and other operating costs. In addition, certain non-recurring professional fees incurred is also a main reason for the increase in administrative expenses during this period.

Business Review *(continued)*

Facing the inflationary trend in the rental market, the Group continued its prudential strategy in distribution channel development. To achieve the goal of retail network optimization, certain shops have been leased and planned to be opened in the second half of the year.

Prospect

Year 2007 marked an important year of transition for the group. With extensive resources and connection in the PRC of the new management team, the Group targets to enter into new businesses with substantial return potential for shareholders. As per announcement dated November 13, 2007, the Company entered into a conditional agreement with an independent third party to acquire mining companies in the PRC which involve zinc and lead mines ("the Acquisition"). The Company is being prepared a circular to the shareholders of the Company since the Acquisition is subject to shareholders' approval. As a whole, we expect that our targeted businesses development areas will include but not limit to nonferrous metals industry in China. The Company will publish an announcement if there are any new businesses in future.

For the apparel retailing business, the Group is seeking strategic partners with solid experience in brand building to develop our "Gay Giano", "Cour Carré" brand in China. Our brand mainly targets middle class white-collar employees who favour professionalism and an upbeat image. The rapid development of the banking, insurance, finance, securities, properties as well as various commercial segments in China will create huge demand for our apparel products. Regarding the Hong Kong market, it is expected the sales performance will improve as the Hong Kong economy is posting steady growth and the financial and commerce sectors will see better salary improvement in 2008.

We see positive growth prospects for the Group's businesses. In particular, business development in China and Hong Kong will go from strength to strength by capitalizing on the strong growth momentum of these markets. The new management team aims to put the group in an enviable position to prosper on sustained growth, and to maximize returns for shareholders.

As of September 30, 2007, the total outstanding short-term borrowings was approximately HK$6.8 million. Borrowing methods used by the Group mainly include bank loans and other loans from financial institutions. The interest rates of most of these loans are determined by reference to the Hong Kong dollar prime rate. The Group had no interest rate hedging arrangement during the period under review.
